Grapevine Breeding Programs for the Wine Industry ...

The aim of a number of grapevine breeding programs throughout the world is to develop new varieties resistant to diseases using complex hybrids between European and American species of *Vitis*. Within these breeding programs it is essential to maintain heterozygosity and desirable hybrids are multiplied by asexual propagation.

Progress in grapevine breeding | SpringerLink

We complement the traditional breeding program with experimental approaches to develop complete maps of grapevine chromosomes, and to study functional gene expression. In addition to my research responsibilities, I was Chair for over 10 years of the Grape Crop Germplasm Committee, a national committee overseeing U.S. Department of Agriculture ...

Bruce Reisch | Viticulture and Enology

Introduction. Einset and Pratt (1975) provided a review on grape breeding in "Advances in Fruit Breeding".

Furthermore, Reisch and Pratt (1996), and Reisch et al. wrote reviews on grape breeding, adding key advances in grape science. These reviews were written in English, and were widely read around the world. They only briefly mentioned breeding in Japan, so this review focuses on ...

Advances in table grape breeding in Japan

Breeding for rootstocks started toward the end of the nineteenth century after the era of Phylloxera devastations of European vineyards. During the twentieth century, active breeding programs for table grapes were initiated in the USA, both by the USDA and by various institutions, which resulted in many new cultivars with improved characteristics.
