EC8651 Notes Transmission Lines and RF Systems - Padeepz

A transmission line is a two-port network connecting a generator circuit at the sending end to a load at the receiving end. Unlike in circuit theory, the length of a transmission line is of utmost importance in transmission line analysis. z 0.

Transmission Lines - Basic Theories

Waves on Ideal Transmission Lines: On an ideal transmission line, there is generally a wave moving from source to load V^+e^{-jkz} , and a wave moving from load to source V^-e^{jkz} . The coefficients V^+ and V^- are constants independent of z , since the line is lossless. The corresponding currents are $(V^+/Z_0)e^{-jkz}$ and $-(V^-/Z_0)e^{jkz}$.
