Landscape photography requires different things from your camera than street or sports photography. Your camera needs to capture as much detail as possible and perform at a high resolution. At the same time, you need to be able to use the dynamic range and know how to take advantage of your DSLR camera's sensor.

## **The Ultimate Guide to Landscape Photography (85 Best Tips!)**

Landscape photography is photography that occurs in the great outdoors. It is separate from what we know as nature photography. Usually, landscape photography captures an impressive natural scene—an imposing mountain range, a serene, sprawling field, a river roaring by—untouched by human presence (besides the photographer's, of course).
